

Pulverisette 4

Planetary Ball Mill

Principle

Powder grinding by means of the friction and impact effect of grinding balls. Dry and wet grinding possible

| | |
|--------------------------------------|---|
| Manufacturer | Fritsch |
| Max. revolutions of sun wheel | 300 rpm |
| Max. revolutions of planets | 2000 rpm |
| Powder loading | 30-125 ml per grinding bowl |
| Grinding balls | Steel: 2-20 mm |
| Special feature | The direction of rotation and rotation speed of the sun wheel and planetary wheel can be set independently of each other |
